

Press Release

Creator's Stained Glass is pleased to introduce The Waffle Grid™ as your newest product in 2007. This interconnecting grid allows the user to configure to the shape of their work table. Through its unique design, you can configure around a corner, as a connecting backsplash or even randomly turn up individual grids to have a smooth area amid a pocketed area. You can even see through it for angle patterns.

Made of high impact polycarbonate (Lexan®), the surface of the ½ inch pockets is rounded smooth, to allow your glass to glide. Want to clean out debris from a section...just lift it out. No need to disturb your whole work surface !

The Waffle Grid comes packaged in a 6-Pack and a 2-Pack. This innovative product will be available for shipment in April.

The components are 11.25" X 11.25". For pricing, minimum order and delivery information, contact:
